

GREENWIZARD AND INTERSPEC FORM COLLABORATIVE PARTNERSHIP

Future Integrated Tools From InterSpec and GreenWizard Will Help Solve Issues of Green and LEED-Oriented Materials' Specification, Including Product Discovery & Evaluation

GreenWizard® Inc., web-based solution to simplify building material selection, optimization, and documentation for projects seeking LEED® certification, and InterSpec, purveyors of a family of products built around the patented e-SPECS technology, today announced they have entered into a collaborative partnership.

e-SPECS is the leading BIM integrated specification management software providing a platform for customers to manage their design preferences, lessons learned, code requirements, LEED criteria, and more. With the e-SPECS platform, users can save time and money integrating project specification manuals with their building information models and drawings, reducing RFIs, change orders, and addendums. e-SPECS is integrated with the leading design solutions, such as Autodesk Revit, AutoCAD and Autodesk Architecture products and the leading master guide specifications including MasterSpec, VA Masters, Canadian CMS, and NMS specification masters.

GreenWizard is the only data-driven workflow solution that puts product search, LEED credit modeling/assessment, procurement, and LEED documentation at the fingertips of the design and construction community. By combining the thought-leading data capabilities of GreenWizard and InterSpec's e-SPECS, users will soon have access to a vertically-oriented software offering for product-research, specification, procurement, and documentation that is second to none.

ABOUT INTERSPEC

InterSpec began development of its e-SPECS specification automation technology in 1998. e-SPECS is the first product ever to successfully link CAD drawings to the master guide specifications, a truly unique automation and quality control innovation for construction specifications. InterSpec has been using e-SPECS to deliver remote spec-writing services since 2000 and is now the leading provider of Internet-based construction specification management services to architects, engineers, building owners, and product manufacturers across the country. InterSpec's e-SPECS automates the preparation of construction specifications by extracting the product and material requirements directly from the Building Information Models (BIM) and/or CAD drawings instantly updating the project specifications to the requirements of the building model. e-SPECS integrates with CAD and BIM applications including Autodesk's AutoCAD® and Revit-based products and supports all libraries of MasterSpec® as well as the Canadian CMS and NMS specification masters, VA Masters, and integration with custom office masters.

“One of the hardest task in managing construction projects (especially LEED projects) is mastering the required product-research, specification, procurement, and documentation,” said Adam Bernholz GreenWizard’s CEO. “Now, with this partnership between InterSpec and GreenWizard, specification writers will have access to a truly revolutionary toolbox to identify, analyze, and specify the leading green building products on the market.”

“GreenWizard already has an impressive array of products and material content in the green-building product space,” said, Michael Brennan, InterSpec’s CEO. “GreenWizard’s software allows users to research, model, optimize, and document green building product decisions. By integrating GreenWizard with e-SPECS’ specification automation and BIM integration solutions, our customers will have access to these tools and information right from their e-SPECS applications.”

About GreenWizard

GreenWizard, Inc. is a technology company that has created a SaaS solution to help the design build community simplify the process of green product selection and management. Architects, project owners, consultants, contractors, and others use GreenWizard’s WORKflow platform to compare and evaluate products from a centralized search engine and directly communicate with manufacturers. For those seeking LEED certification, it also offers an end-to-end solution by utilizing its proprietary credit assessment tools as a factor in the product selection process to optimize credits, manage product-related documentation, and ultimately automate the online submission component to LEED Online. Manufacturers and suppliers provide product data and documents through GreenWizard’s MARKET Pro platform, which populate its search engine. GreenWizard also has a LEED AP Consulting Division that assists WORKflow Enterprise project teams in finding, specifying, and buying products on an as-requested basis. The Charleston, SC-based company was founded in 2008. More info: www.GreenWizard.com.
